The bungalows shown in the photo to the right taken by the Planning and Development staff are not typical of the houses in this area and represent only a small number of houses.

The house on the left was built in 1923 and the house on the right was built in 2004.

Below are some of the houses on that street that are more representative of this area.

This is not a fair comparison.

1687 Glendale St. is a stand alone house with the front door facing Glendale St. unlike most structures which have the front door facing the back of the parent parcel. This home is a 2 bed, 1 bath concrete block stucco structure with a 50 year architectural roof, central heat and air, separate water and sewage and electrical, and separate homeowners insurance coverage. Home has been separate from parent parcel since being built in 1958. See attached photo page of 1687 Glendale St.
