PURPOSE: White Paper (Explain Why this legislation is necessary? Provide; Who, What, When, Where, How and the Impact.) Council Research will complete this form for Council introduced legislation and the Administration is responsible for all other legislation. (Minimum of 350 words - Maximum of 1 page.)

Exiting condition is a T-interaction that experiences significant queuing on the south bound approach of Scott Mill Road during the weekday afternoon peak period. The queue spills back and obstructs residential driveways creating a hazardous condition. A traffic control warrant analysis was conducted by Traffic Engineering and it was determined that an exclusive south bound right-turn lane would mitigate the queuing during the peak periods. Deferral of this amendment of the CIP until the next annual budget and CIP review will be detrimental to the best interest of the community because such deferral will result in the unnecessary delay of construction of the turn lane. The Public Works Department / Traffic Engineering Division will provide oversight for this project.
