**PURPOSE:** White Paper (Explain Why this legislation is necessary? Provide; Who, What, When, Where, How and the Impact.) Council Research will complete this form for Council introduced legislation and the Administration is responsible for all other legislation. (Minimum of 350 words - Maximum of 1 page.)

The Herschel Street culvert running southeast located between Pinegrove Avenue and Van Wert Avenue is failing. The culvert is a corrugated steel plate arch pipe that is partially crushed, held up by a wooden pole at one end. Some of the metal culvert has rusted away. Both headwalls are cracked and are held together by a mounted external steel bar. The roadway shows distress with stress cracks and pothole patches. The roadway has settled along the curbs, creating standing pockets of water. The channel is choked with debris and sediment.

Proposed solution is to close the road, remove the failed culvert, and replace it with a precast box culvert. The channel will be cleaned and stabilized. New City Standard curb will be placed along with new curb inlets. Sidewalks will be replaced on both sides of Herschel Street. Replacement balustrades will attempt to match the existing balustrades, this work has been coordinated with the Riverside Arlington Preservation Committee and the Historic Preservation Committee. Coordination with JEA will be required to relocate the 10" water line running on the east side of Herschel. AT&T has twin terra cotta multi-duct conduit that cannot be relocated or replaced. AT&T will pay to have their duct bank supported during construction as well as any upcost incurred by the contractor associated with avoidance of the AT&T utility. Deferral of this amendment of the CIP until the next annual budget and CIP review will be detrimental to the best interest of the community because such deferral will result in the unnecessary delay of completing the project repairs.
