Career History & Accomplishments:

- Employed by Marietta Sand Corporation for the past 23 years. Dawn Motes is the President and majority shareholder of Marietta Sand Corporation, a Complete Site Development company located on the west side of Jacksonville that has been in business since 1975. They are a certified subcontractor that performs site work, demolition, underground utilities and provides dump truck hauling and fill material for all phases of construction work here in Northeast Florida related to commercial, industrial and residential work.
- Dawn's former education and career background are in finance. She worked as a Finance Manager for Chevrolet & Cadillac and then as a tax specialist for Bank of Boston here in Jacksonville prior to going to work for Marietta Sand Corporation in 1992. She has been very active in her leadership role both professionally and civically within the Jacksonville community from the inception of her construction career. With a finance background, her initial responsibilities for Marietta Sand Corporation were directed to the financial aspects of the company and involved managing and processing all the administrative and accounting functions necessary to own and operate your own business. That quickly evolved into learning how to read construction plans to perform take-offs by hand and estimate projects for both the trucking and site division which lead to project managing jobs and a team of 40 employees while also marketing the company for additional growth. She has had the distinct honor and privilege of learning the entire business over the past 23 years with Marietta Sand Corporation with real "hands on" experience. This paired with educational construction courses and completing her General Contractor's course and exam with the State of Florida has been extremely beneficial in her personal quest to excel as a woman in the construction industry.

She is a strong advocate for supporting organizations and locally funded programs that support and promote the economic growth of Jacksonville as well as our construction industry here in NE Florida through education, training and local community business leaders that focus solely on a better Jacksonville for "all" its residents. Her business philosophy has always been to work smart, maintain a strong, honest work ethic and be responsible for your actions. She also believes that having a strong company mission statement that every employee can take part in and believe in is part of your success. Marietta Sand Corporation's is "Our goal is to exceed the customers' expectations".

- She was promoted to Vice President of Marietta Sand Corp in 1994.
- She was promoted to President and became majority shareholder of Marietta Sand Corporation in 2009
- Under her leadership, Marietta Sand Corporation has been the proud recipient of several Associated Builders & Contractors, Excellence in Construction Eagle Awards for many local Jacksonville projects, all to include the Black Sheep Restaurant, the Cummer Museum project and one of the local Gate Stations.
