FUNDING REQUEST

**Environmental Protection Fund
Request for Funding Assistance
GROUNDWORK JACKSONVILLE – S-LINE / HOGANS CREEK
URBAN BIODIVERSITY CORRIDOR**

Purpose

The purpose of the bill is to authorize funding from the Environmental Protection Trust Fund to Groundwork Jacksonville (GWJ) to assist them in the development of the S-Line Bio-Diversity Corridor proposed between Davis Street and Boulevard located in Springfield adjacent to the headwaters of Hogans Creek.

Background

The Fund, which was created in 1984, was established under the Board's purview to be used by the Board for the purposes described in Section 360.602 O.C. The established purposes for use of the Fund include:

- Restoration of polluted areas subject to Board actions.
- Restoration where costs exceeded amount recovered from responsible party in judicial or administrative proceedings.
- To recover the costs and expenses of the Board in administering the Fund.
- To pay for the removal (emergency) or remedial actions (cleanup).
- To fund education and outreach activities, studies, surveys, tests and investigations pertaining to the duties of the Board.

Sources of Fund revenue include:

- Fines collected by the City
- Moneys received as a result of an administrative or judicial proceeding
- Moneys recovered as punitive damages
- Moneys recovered as civil penalties

Description

The goal of the Biodiversity Corridor along the S-Line is to increase the awareness, education, engagement and activation of the people living in and/or visiting the 32206, 32208, 32209 neighborhoods about watershed conservation, designing low-impact development and building green infrastructure to improve air and water quality. When combined with the habitat restoration project along McCoys Creek, the project will go a long way to making the S-Line and Hogans Creek "shining parts" of the proposed Emerald Necklace consistent with the vision and mission of Groundwork Jacksonville and addresses the needs of the City of Jacksonville. It is aimed at improving the waterway's health and function, flooding, water quality, and aesthetics, while considering where recreational amenities and green and natural stormwater remedies can be incorporated.

Project Goals

The Bio-Diversity Corridor is proposed between Davis Street and Boulevard located in Springfield is. This section of the S-Line is located next to the headwaters of Hogans Creek. The biodiversity corridor along the S-Line is prime for a pilot phytoremediation project. There are primarily two goals associated with the project:

- Goal 1- Design an education and awareness campaign on the value of turning brownfields to greenfields through low impact development
- Goal 2 - Design and build/implement the green infrastructure and accessibility features in the attached budget to improve water and air quality and provide the demonstration project to bring awareness to the benefits of both green infrastructure and the S-Line as an alternative transportation mode.

Funding

- The EPB has authorized funding, pursuant to Section 111.755 O.C., in the amount of \$50,000 to support the project. The EPB unanimously approved the project at its May 2016 meeting. It ratified the funding approval at its June 2018 meeting.
- The Environmental Protection Fund consists of non-General Revenue monies collected by the City pursuant to O.C. Chapter 362, Chapter 368 or Chapter 376.
